State of New Jersey Selects Teradata for Division of Taxation Data Warehouse

System to support tax compliance for five million individual tax filers and one million businesses

DAYTON, Ohio – The State of New Jersey, Department of Treasury, Division of Taxation today announced the implementation of a Taxation Data Warehouse with global Enterprise Data Warehouse (EDW) leader [Teradata](#), a division of [NCR Government Systems LLC](#) which is owned by NCR Corporation (NYSE: NCR).

The primary mission of the Division of Taxation is to attain the highest possible level of compliance among taxpayers, specifically the accurate and timely filing of tax returns and payment of tax due. Currently, the state of New Jersey collects over \$1 billion per year in compliance revenue through audits, collection, non-filer discovery programs, under-reporter detection programs, and registration compliance.

“Previously, we were unable to effectively analyze vast amounts of data that were available to the tax department and to identify unknown non-compliance issues,” said Bob Shickora, Director of the Taxation Data Warehouse for the State of New Jersey. “With this contract, we will now be able to bring compliance data together for query and business

-more-

intelligence as well as improve compliance processes through better use of available data and standardization.”

“The Division of Taxation is taking aggressive steps to advance its collection processes,” said Leslee Gault, president, NCR Government Systems LLC. “We are delighted that we could apply our government experience and data warehouse expertise to the State’s compliance challenge.”

NCS Technologies, a partner of Teradata is working in concert with the Teradata team on the implementation of the Taxation Data Warehouse analytical functionality.

"NCS is honored to continue our strong partnership with Teradata and participate in an initiative that will ultimately provide great value to our home state of New Jersey,” said Antonio Orrico, chief executive officer, NCS. "We have a long list of successful joint initiatives across the country with Teradata, all of which we value greatly, but in this case the ultimate benefit hits very close to home."

This will enable the Division of Taxation to analyze data relationships and business trends in a simple "drag and drop" fashion, bringing the full power of the data warehouse directly to the desktop. NCS specializes in Business and Technology consulting solutions for Fortune 500 companies and partners with Teradata to implement Business Intelligence solutions in concert with data warehouse initiatives for customers across the U.S.
